

İş No : KZUSI-2

Tarih : 24-Oct-09

Bu rapor düzenlenmiş makaleniz ile ilgili genel bir özet sunar. Her bölüm için ayrı değerlendirmeler yapılmış ve bu değerlendirmeler örneklerle (uygun olduğu yerlerde) doğrulanmıştır.

| Yapısal Bakış | Bölüm | Yorumlar | Örnek |
|---|-----------------------------|---|---|
| | | | |
| Yapısal Bakış | Başlık ve Özet | We have edited the manuscript in the with the intended outcome. The sections of the manuscript require some reorganization, clarification or correction. Please refer to the following comments. | The introduction section is well written and concise. The background information is clear and relevant. The study aims are clearly stated and the results are well summarized. |
| | Başlık ve Özet | The title was not informative enough, and required some revision. Please check carefully the changes/suggestions provided. We have carefully checked the title to ensure that it clearly contains the aim of the study. Although the abstract followed a logical structure, some changes for clarity were made. In the abstract, we have edited grammar, methods and materials, results, and conclusions for clarity. | The title was not clear for the study and information, but not concise. We have edited it for clarity and better readability. It had to be revised because it should be understood according to journal instructions. We have added statistical data to the results for better reader comprehension. |
| | Giriş | In the introduction, the purpose and approach of the study are clearly indicated. The statement of the relevance of the findings is included in the introduction. In the introduction, the scope of the investigation is not included. Please include this information. This section does not state the aims of the problem and investigation. Please include the statement in the introduction. | Please check if this is important enough to be included in this section. Please check if they are important enough to be included in this section. |
| | Malzemeler ve Methodlar | Since the methodology is not described appropriately and cannot be reproduced by another investigator, please refer to our comments for making revisions. In this section, the measurement procedures are not described as required. Please refer to our comments. Statistical significance is appropriately conveyed through the text used in this study, and the variables used appear truly understood. Measurement parameters such as sensitivity and accuracy are described in clear and accurate language. Some calculations were required. | Please consider adding the SPSS program name and version number. This section is otherwise complete. Please consider adding a sentence or brief paragraph about the sample selection procedure and the steps used to compare the two groups. Otherwise, this section looks clear and complete. Please check if appropriate number for a partial correlation coefficient is used. If not, use the appropriate number. |
| | Sonuçlar | Some of the sentences from the Results section were moved to the Discussion section. All the reported findings are relevant to the thesis. The text contains appropriate summary of key results presented in figures and tables. | The better flow, we have broken down some of the longer paragraphs into smaller ones, focusing on a particular variable in a single aspect of the analysis. Please check. Our demographic should always come first. Table 2 should be renumbered as Table 1, and vice versa. Please check. |
| Periferik Metin İnceleme | Tartışma | Discussion regarding whether some of the key results support the main hypothesis was not convincing. The length of the discussion is appropriate. The content presented in the Discussion section is appropriate and does not repeat information from the Results section. Not all of the conclusions are clear. | Discussion does not address all the Results reported and needs to be elaborated further. We have reorganized and simplified some sentences for better presentation of information. The conclusion has been shortened to summarize the main point of the paper. Please consider adding supplemental data in the form of tables showing the results of the statistical analysis of the variables studied, and refer to these tables in both Results and Discussion. These numbers are important in understanding your analysis. |
| | Rakamlar ve / yada Tablolar | The figures and/or tables support the main text, and there are some minor discrepancies. They have also been cited in the main text at appropriate places. The legends are somewhat complete and accurate. In this manuscript, some figures and/or tables need reference to the text for better comprehension. | Please check Remarks 4. Please provide the statistic details for Figure 1B and 1C as provided in 1. and 1.1., i.e., please mention P < 0.05 at the top of the graph. Please provide footnotes to explain some of the abbreviations and units used (e.g., unitless time frame). |
| | Kaynakça | Most statements of fact are supported by appropriate references. The literature cited is very pertinent to the investigation. Note that many references cited in the manuscript did not follow a consistent format. | Some sentences in introduction require supporting references. They have been tagged accordingly. Please check. We have formatted both in-text as well as end-text references according to the journal guidelines. |
| | İçerik | There are gaps in content in some sections of the paper. Where applicable, the necessary information has been added. | Apart from Discussion, all text needs elaboration. We have pointed this above and in the Remarks file. |
| | Terminoloji | Most of the scientific terminology and representation is appropriate and consistent. The abbreviations/initials/number style is as per the conventions of the subject area. | We have presented the units in an appropriate format as per guidelines. Also, some units did not conform to the SI style. We have pointed these out in the Remarks file. |
| İçerik, Terminoloji, Stil, Biçim İnceleme | Stil | The abbreviations/initials/number style is as per the conventions of the subject area. | |
| | Dergi Formatı | Some journal guidelines have not been followed. We have added a remark for the author to check what needs to be done next, where applicable. We have verified that the structure and/or length of the abstract conforms to the journal guidelines. We have followed the style guide stipulated by the guidelines. | The journal requires a cover letter along with the main manuscript. The checklist is given in the Remarks file. Please check the before submission. Some mistakes are missing, and remarks have been added for the same. Abstract has been revised because it should be understood according to journal instructions, length is fine. We have followed the CBE style as per guidelines. No template application. |
